

Hello, My name is Peggy Peterson.

I am here today to speak directly to our elected public trustees – the Mayor and Councillors.

However, this presentation will also act as a “**Notice from the Public**” to the CITY municipal corporation, its Officers, Members & Staff.
And most notably to the CAO Denise Corry, and the Clerk Tanya Calliega.

We undertake this deputation with the full support of hundreds of local men, women, home and business owners in the Huntsville area.

We are here to point out a serious problem – quite possibly a breach of trust & trust indentures, malfeasance of office, and a conversion of legal status/jurisdiction without right.

This is leaving you all holding *incredible* personal liability for everything you agree to and sign.

So please listen carefully.

At my side is Shelagh McFarlane – she is here as a consultant with experience in municipal governance & is the author of the “**POGG Primer: Ending the Public/Private Partnership Fraud.**”

The POGG Primer exposes the corporate hijacking that is happening in every municipality in Canada using public/private partnerships and the international treaty, **The UN Agenda 21.**

Public-private partnerships are legal “creatures” used to install a **de facto global governing system** instead of a Local Agenda.

The United Nations Agenda2030 has our elected officials turn a local **Dominion of trust** into **international territory** by controlling the **entire** election process and the inaugural ceremonies.

We think we are electing a public official for the Office of the Mayor, as public trustee (and defined by federal legislation), but instead, we get a “**Global/Strong Mayor**” under a **secret Declaration.**

And everything they do becomes secret.

The dangerous part of this agenda is that ANY local decision can be done without public input, and by the signatures of only 2 people, the Mayor and the CAO.

COVID lockdowns proved that these 2 officers can not only call a local emergency **any time they want**, but they can put a needle in your arm **USING ONLY A MUNICIPAL BY-LAW**.

Like a parking ticket.

I have people I know & care for deeply who were affected & injured by these shots.

Including people that work for The Town of Huntsville.

I will leave it at that....

Some questions many of us have now.... when you say you have no power – or that you are “only one vote at the table.”

1. If you, as our elected public officials, are not the body in power & control, who is?
2. Whose orders are you following because they certainly aren't coming from the public, and
3. If the Agenda ideologies like your Climate Emergency Order, turn out to be unlawful and beyond your scope and purview, who do you think will be held liable?

The people in this community have many more questions for you, and they deserve answers! You deserve answers. Actually, we would suggest an old-fashioned town hall at our lovely theatre. This will give you the opportunity to explain to the public the status of this enquiry and give you the opportunity to explain this status currently under control for the town of Huntsville. We hope to give you the opportunity to unravel this mess ... and it is a mess ... and restore the status of our elected officials to public trustee again.

We began as a nation with this type of governance. Now we are controlled by an entity, and ordered about by an international body of people, who are not only not elected, they're not in any way responsible for the town of Huntsville.

By the way, "climate change" is none of our business. We will show that to you at your climate change and environment committee meeting on February 12.

And Huntsville is not alone in this challenging process and it is challenging. It's happening across Canada. It's happening across Muskoka and around the world. The WEF and the United Nations are being exposed for tyrannical fraud. They are unelected, egocentrics who have a plan for another medical tyranny.

How do we move this forward? We carefully assess the situation and then, as community, we fix it.

People are clear, rich, the renters, the homeless, the people who suffer from poverty. Let's never forget that the people in Muskoka suffer for some of the worst poverty in Ontario. And I want to ensure that I clearly state on behalf of many people, that we are saying "NO" to any property tax increase. I'm going to say that again so you understand me clearly. This community is saying "NO" to any property tax increase. We know that the development fees and the additional taxes coming in here on an annual basis, from the clearcutting in the blasting of our community, that there is enough money for you to work with.

In closing, the 2022 election, brought many two-faces to this table. And it's a perfect opportunity to correct a fraudulent system. We're not saying any person is fraudulent. We're saying we have a system that's fraudulent. And fraud vitiates all. Fraud vitiates all.

The reasons will become clear to you over time, how this happened in front of our eyes. It's the planned takeover of your national sovereignty, and your choices as Counselors and Mayor and CAO are clear. Each of you must act lawfully and ethically. Each and everyone of you must do your own due diligence, your own research and decide for yourself the path forward. We ask you to address your oath.

Did you understand when you signed your Declaration of Office, that you were affirming not to your constituents, but of faith to an un-coronated King?

I will read it to you. "I will be faithful and bear true allegiance to his Majesty King Charles the third." This is the Emergency Order, received from the freedom of information request, a few pages.

The doctrine and the orders in this document shock me. The 'whereas' and 'why fors'! We will address this on February 12. However, how can this be an Emergency Order on "Climate Change" with the lack of a signature? It doesn't even tell me who has signed this or what office they are from.

So, what I'm saying is that we ask you to address your oath. And you can fix this by declaring an Oath as a public trustee, so you can be re-oathed. We can carry on business on some level. But, we have to fix the fraud.

We suspect that once you're confident that what we are sharing is true, you will do the right thing.

Because when we know better were supposed to do better. Thank you.
